Re: Himco Landfill-Elkhart, Indiana

The following statements are submitted pursuant to a request by the U.S. EPA; Region 5, in their investigation of hazardous substances in and around the Himco Landfill site, and includes any and all information relating to the following companies: Himco Waste Away or Himco, Inc.

1. Provide a description of your business, including:
 - a. Type of work performed: truck repair, truck cleaning, truck parking
 - b. Manufacturing processes-none
 - c. Waste generated: waste oil, wash effluent, garbage
 - d. Waste disposal practices: waste oil is stored and collected by Wayne Reclamation.* Wash effluent is stored and shipped to the Goshen Sewage Treatment Plant, Goshen, In. Garbage is picked up by Himco Waste Away in one of their dumpster (solid waste). This consists of wood, paper, metal, plastic and organic material.
(*Wayne Reclamation & Recycling, Inc.-Wayne Waste Oil, Div.)
 - e. SIC Number: ~~4200~~ UNKNOWN
2. As far as we are aware, we do not generate hazardous wastes. Our waste oil is removed by Wayne*, but we have no contract. Our wash effluent is taken to the Goshen Sewage Treatment Plant, but again we have no contract and to the best of our knowledge, neither of these wastes constitutes a hazardous waste under current definitions.
3. To our knowledge, we did not make arrangements with Himco Waste Away or Himco, Inc. to dispose of wastes at the Himco Landfill, nor have we arranged same with any other firm. We have no idea where Himco would have taken our solid waste (garbage) consisting of wood, glass, metal, paper, plastic, and organic materials.

In as much as the answer to question 3 was not yes, we have not answered or provided information on the remaining five questions.

Very truly yours
